Pursuant to the duty of disclosure set forth in 37 CFR 1.56 and in accordance with the provisions of 37 CFR 1.97 and 1.98, the following information is brought to the attention of the Examiner for consideration during examination of the instant application.

These materials are being submitted in the instant application so that the Examiner can make his own determinations as to relevance of these documents. Copies of all available documents are enclosed, as is a completed copy of substitute form PTO-1449. In accordance with M.P.E.P. Section 609, copies of U.S. patents, which are readily available to the Examiner, are not enclosed. Accordingly, the Examiner is requested to consider these documents and indicate their consideration by initialing the attached substitute form PTO-1449.

02/07/2007 MBERHE 00000153 09454492
01 FC:1806 180.00 DA

The undersigned submits herewith documents that have been brought to the attention of the undersigned as having been produced in a litigation concerning patents which are related to the present application (namely, U.S. Patent Nos. 5,910,988 and 6,032,137, which are the underlying patents for Reexamination proceedings 90/007,929 and 90/007,830). The present application is a divisional application of U.S. Patent No. 6,032,137. U.S. Patent No. 6,032,137 (already of record and cited in the IDS filed on March 31, 2004) is a continuation-in-part of U.S. Patent No. 5,910,988 (already of record and cited in the IDS filed on September 12, 2002).

The following documents are made of record:

(1) Search Report of EP application 98 942 251.4 – 1238, filed on October 24, 2005, which corresponds to U.S. Patent No. 5,910,988.

A. The following documents were cited in the Search Report of EP application 98 942 251.4 – 1238:

(5) U.S. Patent No. 5,457,747.

B. According to M.P.E.P. Section 2001.6(b), if an application under examination is identified as a continuation, divisional, or continuation-in-part of an earlier application, the examiner will consider the prior art cited in the earlier application and no separate citation of the same prior art need be made in the later application. However, in an abundance of caution, the prior art cited in the parent application of the instant application is cited herein. The following documents were cited in U.S. Patent No. 5,910,988:

D. U.S. Patent No. 6,032,137 and U.S. Patent No. 5,910,988 were involved in a number of court proceedings. Some of those court proceedings were disclosed in the IDS's previously filed in the instant application. A large number of documents were introduced by other parties during the court proceedings and the parties did not point out the relevance of many of those documents. In an abundance of caution, the Applicant is bringing to the attention of the Examiner at least those documents whose relevance was discussed by the other parties or the Patentee.

E. Furthermore, the Applicant has received four DVD's with a total of over 16 gigabytes of information, from a third party involved in an earlier litigation of the above-mentioned patents that are undergoing Re-examination proceedings. One gigabyte corresponds to 1024 Megabytes. A floppy disk that can hold 1.44 megabytes is capable of storing approximately 300 pages of imaged documents. An 8.4 gigabyte hard drive can store about 8.4 billion characters and can hold close to 180,000 imaged pages of documents. (See the enclosed copy of a web page from aol.com concerning Drivespace FAQ.) A single sided standard DVD can hold approximately 4 gigabytes. It is estimated that the four DVD's can contain over 320,000 pages of imaged documents. While it is difficult to estimate the exact number of pages actually contained on the four DVD's without opening or printing those documents, the fact remains that the relevance of most of those documents was not provided by the third party. An IDS that includes a submission of copies of non-patent literature in the order of 5,000 pages, is less than 2%

of the pages that can be accommodated on the four DVD's received by the Applicant. Thus, it would be unrealistic to properly consider the information on the four DVD's within a reasonable time frame. Therefore, the Applicant has not reviewed those documents and does not know the relevance of those documents. In an abundance of caution, the Applicant is bringing this information to the attention of the Examiner. However, the Applicant believes, based on the third party's failure to discuss most of those documents, that the documents not specifically discussed are not relevant to the instant application. If the Examiner wishes to obtain a copy of the DVD's which contain the extremely large number of documents, then the Applicant will submit a copy of these four DVD's upon request by the Examiner.

F. Furthermore, on May 10, 2006, the Firm of the undersigned received an unsolicited e-mail titled "USPTO Reexam. C.N 90/007,829, Requested Date: Nov. 25, 2005" from "PT" <admin@patentrakker.com>. This e-mail was addressed to the Firm of the undersigned as well as the Third Party Requester (jkushan@sidley.com) in regards to the above-mentioned Re-examination proceedings and states: "We routinely monitor and perform prior art searches on issued and pending patents. These references were uncovered for your subject case. We invite your feedback. Many of these reports will be published on the internet in the coming weeks and are being provided to you to aid in your compliance with USPTO Rule 56." The e-mail does not indicate the relevance of

any of the documents listed, who “patentrakker” is, nor what this entity has to do with the above-mentioned Re-examination proceedings. It is believed that this e-mail may pertain to solicitation of work. Therefore, the Applicant has not reviewed these documents and does not know the relevance of the documents. Nevertheless, in an abundance of caution, the Applicant brings this information to the attention of the Examiner:

(76) E-mail of May 10, 2006 titled “USPTO Reexam. C.N 90/007,829, Requested Date: Nov. 25, 2005” from “PT” <admin@patentrakker.com>.
